

Does your company have the X-factor?

A mining company's ability to efficiently collect and analyse data is the key to its success.

Streams of data are received every second of every operating day from various sources.

Not all data is compatible. It needs to be translated and cleansed.

Intov8's **xConnect** software offers the ultimate data "translation" service. With **xConnect**, all data is seamlessly connected.

This unique technology is used by industry leaders and mining giants to streamline operations.

Data from a variety of different sources flows into the **xConnect** software and is converted into ONE simple language.

Ground-breaking technology

xConnect allows you to automatically collect and standardise data across all sites no matter the data source. xConnect can consume and normalise all data at your mine site

It is ground-breaking technology like this that makes **Intov8** stand out from the crowd. It's our secret source.

Gone are the days of time-consuming Excel spreadsheets and lost productivity.

And gone is the need to interface directly with a system using multiple

interfaces for each system – each speaking a different language.

No matter what Fleet Management or source system you are using **xConnect** can read the data and deliver it to a single readable source.

With **xConnect** you can minimise human error and maximise accuracy.

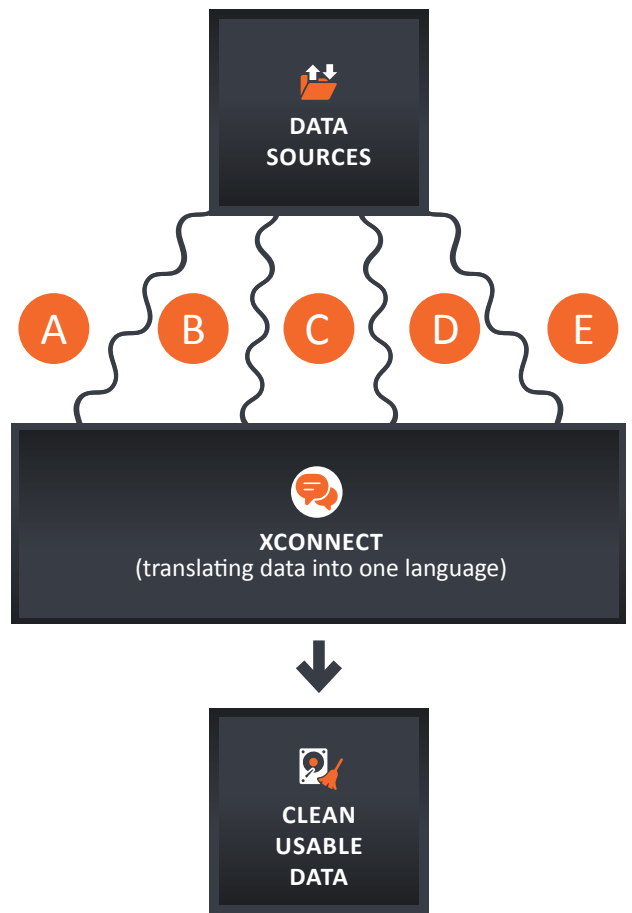

The end result is cleansed, usable, functional and timely data.

KEY BENEFITS

- DELIVERS** unique data translation into one normalised source
- ANY** source system can plug into **xConnect**
- ALLOWS** any system to speak the same language
- TRANSLATES** data into ONE language
- PROCESSES** data in near real time
- ALLOWS** multiple systems to do similar functions
- ELIMINATES** the need for cumbersome, time-consuming Excel spreadsheets
- DELIVERS** greater accuracy and minimises human error
- PRACTICAL** and easy-to-use.
- INCREASES** productivity and profitability

How xConnect saves you time and money

- The ability to convert data into one simple language in real time has significant benefits for mining companies.
- With **xConnect** there is no need to tie up staff compiling detailed Excel spreadsheets, which can be prone to human error.
- One wrong data entry can have catastrophic results for a business.
- **xConnect** streamlines the entire process converting data into a language that is ready to be processed.
- The data can be transmitted to the Remote Operations Centre where it can be analysed and compared to other systems in near real time
- Operators have an instant snapshot of site operations as all data is processed simultaneously.
- This can result in significant time savings, boosting productivity and profitability.
- With **xConnect** supervisors and staff can work more efficiently – with less stress.
- **xConnect** delivers immediate and measurable operational and financial benefits.

Proud track record

Intov8 provides software solutions to some of the world's largest mining companies.

Our software has been developed by miners for miners. We have a deep understanding of the mining industry worldwide. Our team has proven experience in mine systems development, business improvement, system integration and mine production analysis.

The *Corvus* suite of products and our experienced implementation team can create a solution to minimise your downtime and increase productivity.
